AnyFileBackup FTP 4.6.4.0 Crack+ [Mac/Win]

AnyFileBackup FTP Free Download is a reliable and feature-rich software program, enabling you to back up and synchronize data from FTP servers

to various local or online locations. The program allows you to move files from an FTP account to either your computer or online server, its operation being flexible and easy to use, allowing the creation of backup tasks on a remote or repeated basis. The GUI of the program is intuitive and simple to use, while certain functions can be carried out through an 'on-the-fly' wizard, handy when working with computers who are not connected to the internet. The program is not just a simple FTP client however; it is actually an essential tool for anyone who works with FTP servers, providing a number of functions that can help you transfer files from a remote location to your desktop. It can be used for the purpose of daily or weekly backups, getting rid of files that are older than defined parameters, or to simply ensure that all data is backed up. The program is not just a simple FTP client however; it is actually an essential tool for anyone who works with FTP servers, providing a number of functions that can help you transfer files from a remote location to your desktop. It can be used for the purpose of daily or weekly backups, getting rid of files that are older than defined parameters, or to simply ensure that all data is backed up.

- Synchronize data between your FTP server and your computer or online server.
- Back up files and folders on your FTP server to your computer, or synchronize to a remote FTP server.
- Unpause files from FTP server at the specified time.
- Clean-up backup cache files from FTP server.
- To move and backup only the latest version of file or folder.
- To backup/synchronize file and folders from your FTP server to your computer, or from FTP server to FTP server.
- To move and backup only the latest version of file or folder.
- Removing backups that match certain criteria, such as those that are older than the specified time.
- Scheduled backup and synchronize operations to ensure that no files are lost, even if the computer is shut off.
- Remove duplicate files from FTP server.
- If the computer is shut off, the backups will still be running.
- Operate the backup with a scheduler (to do so by changing its settings).
- Use the scheduler to backup/synchronize to different remote FTP servers.

Transfer files and folders from your FTP server to your b7e8fdf5c8

AnyFileBackup FTP 4.6.4.0 Crack + Download For PC

Transfers your files from any FTP server. Super fast, reliable file transfer. Automatically backs-up all your files. More connections to any FTP server! Countless features. Easy to use, just drag-and-drop. Convenient email notifications. Schedule / Repeat operations. Backup now and automatically! Create Backup. Create a Backup and automatically connect to your server. Setup one or multiple FTP servers. Synchronize anything, from single files to entire directories. Manage your backups with a single click. Keep your files up to date! Preserve History. Preserve File History. Wherever you need to. When you need to. You decide when and where. Automatically. Automatically monitor when a backup is needed.

AnyFileBackup FTP is a comprehensive and reliable software solution meant for the transfer of files from FTP servers to local or cloud storage, through backup and synchronization tasks executed at regular intervals, to ensure nothing is lost. Clear-cut and intuitive GUI Appearance-wise, the program features a fairly simple and practical user interface, its usage thus being quite straightforward, even for first timers and computer novices. The main window of AnyFileBackup FTP displays existing tasks, while 'New Task Assistant', a wizard-style component, can help you set up new ones in just a few swift mouse clicks. Backup and synchronize data from your FTP server with other locations The 'New Task Assistant' enables you to pick the operation that you want to perform or schedule, your options being 'Backup', 'Two-Way Synchronization', 'Clean-Up' and 'Monitoring'. It also allows you to 'Schedule Actions' to occur when the processing stage completes (for instance send messages via email, SMS, popup dialog, etc.). AnyFileBackup FTP is capable of using FTP servers as a source for these operations, while the target locations include only local and cloud storage; this basically allows you to transfer files from your FTP account to your computer or an online server. However, should you need to more source or target options, you can resort to the professional edition of the utility. When setting up a new task, regardless of its type, you need to choose the source directory from your FTP server, making sure the connection details are correct
